

New Corrugated Thermal Box Liners

Insulation that doesn't cost the earth.

Kite has developed a range of corrugated insulated box liners as part of our chilled packaging range.

- ✓ High-quality insulating box liners
- ✓ Double wall corrugated paper
- ✓ 100% kerbside recyclable
- ✓ Eco-friendly and low-cost solution
- ✓ Same temperature controlling qualities as polystyrene
- ✓ Assembled by simply folding and securing with the fitted seal & peel strip
- ✓ Use in conjunction with gel or ice packs

The corrugated thermal liners provide an **environmentally friendly thermal pack** suitable for refrigerated food and pharmaceutical products that need to be kept chilled.

Our thermal liners fit our existing Single Wall and Double Wall 10x10x10" or 12x12x12" boxes. They have the **same performance as polystyrene liners**, but being corrugated are 100% recyclable. In addition, they are made from recycled and FSC approved paper making them biodegradable.
