

Spec Sheet: PU Coated Gloves

General purpose warehouse gloves

Designed to be economic yet high performance, these gloves provide the ultimate grip strength for those carrying out tasks that require accuracy, precision, & dexterity.

While these gloves are not oil or waterproof, they do offer some resistance to liquids, for example, when handling wet parts or oily tools. The polyurethane palm coating aids this by absorbing small amounts of liquid whilst also providing excellent grip strength. This minimises the risk of hand slippages and accidents occurring in high risk scenarios and improves workplace safety.

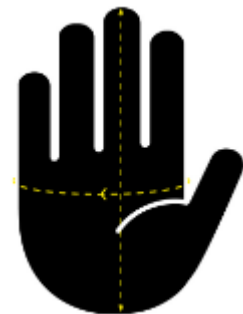

Despite their tight design, these gloves are very comfortable when in use thanks to their soft cotton lining. They are also free of latex which reduces the chance of irritation or allergic reactions from occurring.

Our basic PU gloves are suitable for the following industries:

- Automotive
- Assembly
- Construction
- Component handling
- DIY
- Engineering
- Gardening
- Industrial
- Inspection
- Joinery
