powered by *employee share-ownership*

Powered by **employee share-ownership**, customer satisfaction matters so much more when you own the business.

Offering packaging solutions since 2001, customer satisfaction is the driving force at the heart of all Kite operations.

Open your account today

Business credit accounts are available, subject to a satisfactory credit check, allowing you to benefit from up to 30 days credit

To open a new account:

Do it online by selecting '**open an account**' on our website homepage. The process is straightforward, with your credit check completed and account opened on the day of application

Call our team on **02476 420065**

Book a packaging audit today

Kite Packaging is the only UK packaging company that has the depth of resource to be able to offer full packaging audits through our:

Compliance scheme – packaging waste regulations

Packaging technologists – bespoke pack design and pack velocity

In-the-box solutions – protecting the product inside the box

Pallet wrap division – our specialist team for stretch wrap applications

Book your audit today: **02476 420065**

Online ordering at kitepackaging.co.uk

As a business customer of ours you can expect:

- Online demonstration videos
- Consistently low prices and discounts
- Online guides to help you choose the right product
- Wide range of products
- Credit account facilities
- Easy-to-use search features, such as our 'search by size' tool

Food packaging

Love our planet, please use **less packaging**

Since our founding in 2001, we have championed ranges of enviro-products to minimise the impact of packaging on the environment. “Love our planet, please use less packaging” is proudly displayed on our vehicles, because we mean it. By reducing, reusing, recycling and replacing, we make a real difference to the packaging industry and planet as a whole.

Reduce

We have a dedicated team of experts who carry out stretch wrap audits for our customers, assessing their current packaging usage and strategically streamlining the entire process, resulting in, often significant, plastic reductions. By incorporating our performance films, this is made even easier on account of their superior strength and resultant conservation of material

Replace

At Kite, our paper based products are biodegradable, domestically or commercially compostable, offering sustainable alternatives to many popular products.

Our in-the-box team seeks similar aims with their audits, performing drop tests at every possible angle to determine the likelihood of an intact arrival. Breakages necessitate replacements, not only costing your company more money but also adding to your carbon footprint and consumption of materials.

Recycle

Many of Kite's plastic products comprise of recycled content to enable businesses to enjoy the lightweight, economic and functional benefits of the material without sacrificing their social responsibility to the planet. Typically, these products are also kerbside recyclable.

Reuse

Despite plastic's bad press, Kite's reusable products can be highly eco-conscious thanks to their recycled content and extreme durability.

Award-winning packaging, **award-winning company**

As the UK's Packaging Company of the Year, we are dedicated to delivering the highest standards of excellence, innovation, and sustainability in packaging design.

Our award-winning solutions ensure your packaging needs are met with exceptional care and reliability. We understand that packaging is not just about the about protecting your products; it's about enhancing your brand's image and sustainability goals.

That's why our team of experts work continuously to bring you packaging solutions that not only safeguard your goods but also resonate with your environmental values. Partnered with our unwavering commitment to service, you can expect unparalleled customer support with every order.

Corrugated boxes are cost-efficient, strong, and sustainable. Their high recycling rate maintains material integrity, conserving natural resources and supporting the circular economy.

Standard cardboard boxes

- Recycled content ranging from 60% to 90%
- Sturdy single wall or double wall corrugation
- Some sizes are multi-scored, allowing you to reduce their height
- Available in brown or white

60-90% recycled content Recyclable

Handle with care boxes

- Extra strong double wall cardboard
- "FRAGILE Handle with Care" printed on two sides
- Tape down bottom and top flaps to seal

60-90% recycled content Recyclable

Enviro-boxes

- Reinforced single wall cardboard
- Equivalent strength to double wall boxes with less material
- 30% saving in CO₂ emissions compared to double wall boxes

60-90% recycled content Recyclable

Archive boxes

- Two designs available: integrated lid or premium
- Printed panels for notation information
- Hand holes for comfortable carrying

60-90% recycled content Recyclable

Extra heavy duty boxes

- Our strongest corrugated boxes for heavy goods
- Performance data available for each size
- Popular alternative to triple wall boxes

60-90% recycled content Recyclable

BDC & BDCM boxes

- Industry standard sizes for Bulk Distribution Cartons and Bulk Distribution Carton Metric
- Printed text and spaces on one side for important information

60-90% recycled content Recyclable

Corrugated storage bins

- Aids organisation of picking areas and pack stations
- Folding design, no glue or staples required
- Printed panels to clearly label contents
- Flat-packed for convenient storage

100% recyclable

Picture frame boxes

- Telescopic style box for adjustable fit
- Strong double wall cardboard
- Kraft paper outer for puncture and tear resistance

100% recyclable

Protection for every bottle

1. Bottle carrier

Integrated handle allows for safe transportation.

100% recyclable

2. Flexi-Hex

Expandable protective corrugated sleeving.

100% recyclable

Biodegradable

3. Timber Box

High-quality timber from sustainably sourced resources.

Fully reusable

4. Box with divider

Double wall box constructed with a BC flute, ideal for storing and transporting large volumes.

100% recyclable

5. Pinch top box

Designed by Kite, it is a perfect addition to our Flexi-Hex bottle protection.

100% recyclable

Biodegradable

6. Corrugated sleeving

Perfect alternative to plastic padding or foam.

Fully reusable

Postal packaging

kitepackaging.co.uk

Postal boxes

- Available in white or brown
- High-quality single corrugation
- Quick assembly designs with flat-pack arrival

60-90% recycled content Recyclable

E-commerce boxes

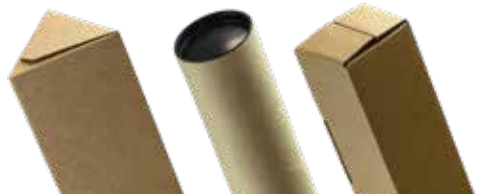

- Fully recyclable and biodegradable
- Integrated peel-&-seal strip and easy-tear opening
- Crash lock base for rapid assembly

Recyclable Biodegradable

Postal tubes

- Available in triangular, round, and square
- Strong and durable
- Suitable for a wide range of delicate goods

Recyclable

Large letter postal boxes

- Fits within Royal Mail's large letter PIP guidelines
- Lightweight and plastic-free
- Ideal for jewellery, gifts, cosmetics, and more

Fully recyclable Biodegradable

1. Capacity mailers

These expandable corrugated mailers are perfect for goods of various sizes.

Fully recyclable Biodegradable

2. Book wrap mailers

All sizes feature a peel-&-seal strip which provides excellent security.

Fully recyclable Biodegradable

Circle labels

- Available in clear and white colour
- Permanent adhesive
- Ideal for arts & crafts, e-commerce, and more

Hazard warning labels

- A range of standard printed self adhesive labels
- Supplied on a roll, with 76mm core and hotmelt adhesive

Integrated labels

- Eco-friendly, minimising paper waste
- Fully customisable
- Time and money-saving
- Streamlines packing and enhances efficiency

40%
LESS

Garment bags and covers

- Bag style features self-adhesive strip and warning print
- Cover style comes on a roll with perforations
- Recyclable garment protectors

Recyclable

Void fill

Void fill and cushioning packaging sits inside a box and serves to prevent internal movement, consequently minimising collisions and opportunities for damage.

Our in-the-box solutions team

Our dedicated in-box solution packaging engineers have developed and maintained some of the most innovative packaging systems in the UK. They work with businesses to find savings through automation and increasing pack velocity.

The range offered includes paper systems, Kite's Mini Air System, Kite's range of Air Shock and Wrap & Hold. Each of these systems provides protection for a range of products, and our engineers will guide you through each step of the process, providing tailored solutions most suited to your operation.

What do our in-box solutions team focus on?

Pack cost analysis

Available to new and existing customers, our team of specialists will visit your site and run an in-depth cost analysis of your current products versus proposed products to find you the most cost effective and efficient solution.

Pack velocity

Our teams work closely with customers on pack design and pack velocity to demonstrate how the two go hand in hand. They will specifically focus on the price of each box, the time to assemble and the labour cost per pack.

Drop test

Our team has access to facilities for conducting packaging testing to the International Safe Transit Association (ISTA) standard. By demonstrating drops from the 'design drop height' for our proposed packaging, we can show to you how your products will be protected even at their most vulnerable times.

SpeedMan Box

- Highly economic manual paper void fill system
- Prevents movement within a box
- 100% recycled 70gsm paper

Fully recyclable
 Biodegradable

SpeedMan Classic

- Floor stand or bench clamp varieties to best suit your packing station
- High-quality manual paper dispensing system
- Funnel feature enables a smoother operation

SpeedMan Pro

- Semi-automatic paper machine with hands-free foot pedal
- 100% recyclable 70gsm paper in brown and white
- Adjustable speed settings for scalable packing
- Available with a floor stand, bench clamp or arm bracket

SpeedMan Flex

- The semi-automatic paper system dispenses at an extremely rapid rate
- Easily integrates into workstations, and is space-saving
- Operates by foot pedal and dispenses up to 2.8 metres of paper per second

PaperJet Fit

- Features an automatic paper intake function
- A space-saving system designed with reduced dimensions for compactness
- Produces narrow, extra-strong padding varying lengths of 10cm to 500cm

PaperJet

- Twice the dispersion efficiency of any other UK paper cushion machine
- 'Program' and 'series' modes grant expert control
- Unrivalled packing efficiency for high volume operations

SpeedMan Basic

- Small footprint suits tight spaces and integrates smoothly into any setup
- Operates with a foot pedal for intuitive and quick use
- Adaptable to different frame configurations and shelf positions

HIVEWRAP

100% PAPER

A sustainable alternative to bubble wrap.

Available in:

-  Brown
-  White
-  Black

1x 500mm hivewrap roll

4x 500mm small bubble roll

- Space-saving
- Paper alternative
- Fully recyclable & biodegradable
- Cost-effective
- Hive shaped cells firmly interlock

Single dispenser

Multi dispenser

Hivewrap auto

A guillotine can also be used with this system for neat and professional cuts.

Void fill & cushioning

Wood wool

- Made from shredded timber
- Keeps items safe and secure during transit and storage
- Offers a natural yet high-end visual finish

Biodegradable

Tissue paper sheets

- Acid-free and chlorine-free
- Highly aesthetic gift wrap
- Available in machine finished and machine glazed

Fully recyclable Biodegradable

Tissue paper rolls & dispenser

- Manual dispenser system increases efficiency
- Ideal for wrapping, packaging, crafts, and gifts
- Produced from sustainably managed forests

Fully recyclable Biodegradable

Large Flexi-Hex sleeves

Flexi-Hex

- Honeycomb structured sleeving to protect glass bottles, ceramics or homeware
- Hexagonal design grants incredible strength and flexibility
- 85% recycled content

Fully recyclable Biodegradable

Flexi-Hex bottle sleeves

Mini Air machines produce air cushion packaging on demand for void fill, wrapping, interleaving and more. All volume requirements are covered by these systems. There is a choice of 12 different films along with a range of accessories.

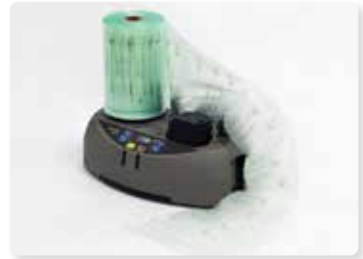

Mini Air Paper

- 100% recyclable, biodegradable and compostable kraft paper cushions
- A plug-and-play system which produces 1,000 cushions per roll

Mini Air Easi

- Entry-level system
- Produces 100% recyclable packs
- Runs up to 8m of film per minute
- Air cushions can fill voids, interleave, layer or wrap

Mini Air Pro

- Advanced-level system
- 100% recyclable films
- Minimal maintenance with self-adjusting temperature
- Able to run up to 32m of film per minute

Filler cushions

- Cushions to be inflated with a Mini Air machine
- Provides cushioning void fill
- Strong alternative to loose fill

100%
Recyclable

Wrapper quilt

- Cushioning pad to be inflated with a Mini Air machine
- Quilted texture for increased flexibility
- Mould around products for impressive protective qualities

100%
Recyclable

Air Shock

Revolutionise the future of protective packaging

Made from transparent LDPE material, air shock is an advanced void fill packaging solution that provides the ultimate protection during transit.

 360° protection  Recyclable

Effective shock absorption

Designed to withstand tears, absorb shock and prevent damage.

Lightweight and transparent

98% of the pouch content is air once inflated.

Highly versatile

Ideal for various delicate items like bottles, ceramics, electronics, and more.

Isolated air chambers

Ensures content remains intact if a chamber bursts.

Cost-effective

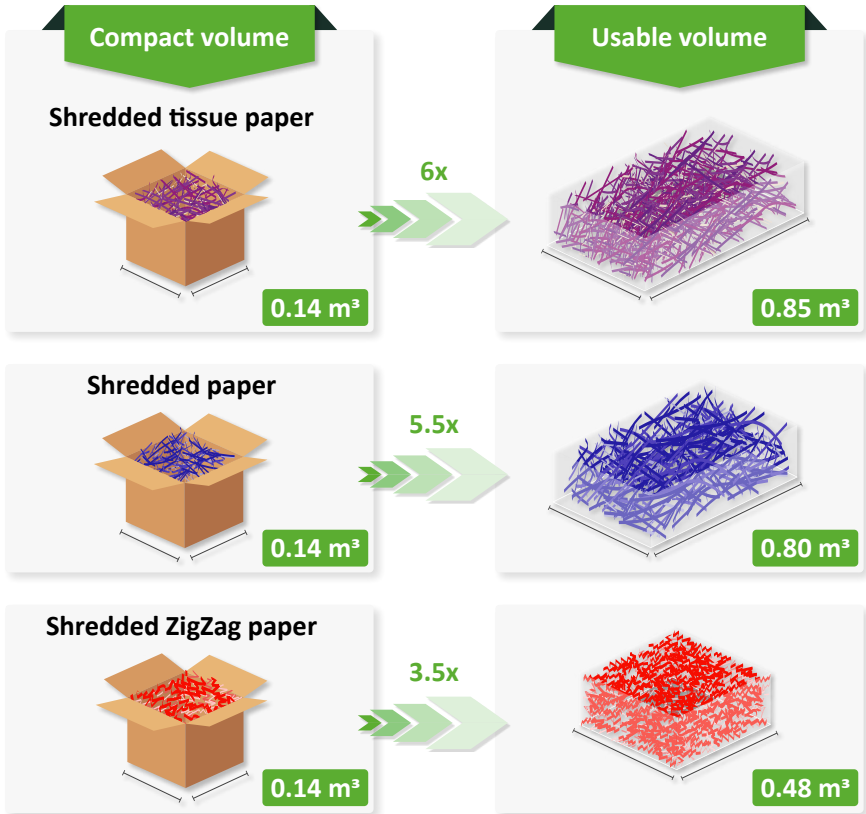

Reduces the need for additional packaging materials.

Shredded paper

Available in three different styles and a spectrum of attractive colours, our shredded paper void fill range provides a premium appearance paired with protective qualities and sustainability. Each product is fully recyclable and biodegradable.

Looking for more colours?

Call **02476 420065** or visit shredhouse.co.uk to discover a huge range of colours for your brand.

Available in **2** colours

Shredded tissue paper

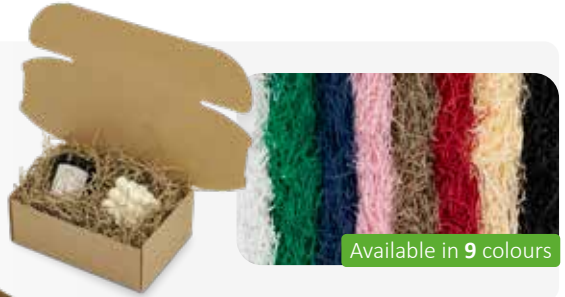

- Luxurious display packaging tailored toward beauty, retail and gift sectors
- Adds protection to lightweight objects
- Made from sustainably sourced paper

Biodegradable Fully recyclable

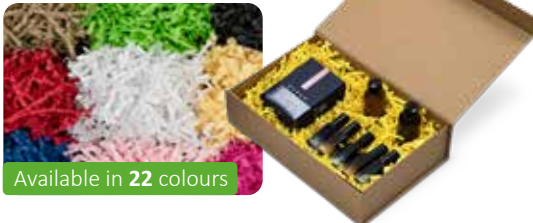

ShredPak 2mm Shredded paper

- 70-80gsm paper, straight cut shreds
- Visually pleasing and protective void fill
- Available in 4kg bales or 10kg boxes

Biodegradable Fully recyclable

Available in **9** colours

Available in **22** colours

ZigZag 4mm Shredded paper

- Aesthetically attractive gift packaging
- 70-80gsm strong kraft paper
- Interlocks to create a dense pack

Biodegradable Fully recyclable

Shredded papers go perfectly with our hampers!

Wicker hamper basket

Looking for stylish, eco-friendly gift packaging that reflects your business's commitment to sustainability? Our wicker hampers are perfect for presenting gifts responsibly.

Handcrafted from split willow

Buckled straps ensure secure closures

Vegan leather hinges and straps

Kraft hamper tray

Our cardboard hamper trays are made from sustainably sourced materials and are kerbside recyclable, promoting responsible disposal by the end user.

Recyclable Sustainably sourced

Vermiculite

- Versatile solution with several non-packaging applications
- Highly absorbent for packing products that may leak
- Mineral-based natural loose fill
- Eco-friendly alternative to polystyrene chips

Biodegradable

EcoFlo starch loose fill

- EcoFlo fill is 100% compostable
- Fully soluble when saturated in water
- Independently verified as offering better impact protection than polystyrene

Biodegradable Compostable

Premium polystyrene loose fill

- Made from 70% recycled content
- Moisture resistant for optimum performance
- Perfect for filling voids and protecting a range of products

Recycled content

Bubble wrap

- Available in small bubbles or large bubbles
- Retail, premium, easy tear and Jiffy varieties
- Popular method of cushioning products during transit
- Available in small, large, and anti-static varieties in 15, 10 and 3 sizes respectively

Paper bubble

- 100% recycled and recyclable paper
- Eco-friendly alternative to bubble wrap
- Deep indentations to make it the strongest product of its type

100% recycled Recyclable

Paper dunnage bags

- Inflate and deflate within seconds
- Stabilise, secure and protect goods during transit
- Outer kraft paper bag provides high tensile strength
- Each bag is subject to quality control testing

- ♻️ Recyclable
- ♻️ Reusable
- 💷 Cost-effective

O-profile

Curved solid board edge protector

For corners:

U-tulip corner protection

Round cut corner protectors

Locked corner protector

= High density foam solution

= 100% recycled and recyclable solid board, eco-friendly alternative

Which carrier (tape material) should I use?

Different carriers react uniquely with different adhesives, making the carrier an important consideration when selecting the right tape for your requirements.

Polypropylene is strong, durable and tear resistant. Often transparent, this type of carrier has been a trusted industry standard for many years.

Polypropylene PVC alternative boasts the same reliability while being able to be torn by hand for rapidity during the packing process.

Paper is the most sustainable carrier currently on the market by being fully recyclable if not reinforced with other components. Depending on the adhesive, it can form one of the strongest bonds.

Which adhesive is right for my needs?

Kite supply tapes that use one, or a combination of, four powerful adhesives:

Hot melt

For exceptional adhesion, flexibility and a quick, high initial tack, a hot melt tape performs well. It is advised for use in temperatures between +15 and +65C.

Solvent

Solvent provides the best performance in extreme temperatures of -25 to +50C and stays sticky in damp or humid conditions. By quickly forming a strong, durable bond, solvent tapes are reliable for long-term carton sealing alongside other diverse applications.

Acrylic

Acrylic performs well in a large range of temperatures, operating between 0 and +65C. Moreover, it is resistant to ageing, weathering, sunlight and discolouration, making it a popular presentation tape with excellent clarity and long-lasting holding power.

Starch

Our most eco-friendly offering is starch, a natural adhesive with incredible strength. When used in partnership with our paper carrier, the tape bonds with box fibres to create a seal that is virtually impossible to tear off once applied.

Coloured tape

- General purpose polypropylene tape with acrylic adhesive
- Available in red, green, white or blue
- Adds recognisable branding to packages

Standard warning tape

- Available in polypropylene, paper and PVC
- Choice of four clearly printed messages
- All tapes low-noise, perfect for busy warehouses

Crossweave tape

- Reinforced glass fibres for extra tensile strength
- High tack strapping tape with high tear resistance
- Suited to heavy duty use and security sealing

Masking tape

- Moisture resistant
- Easily removed with no adhesive residue
- Will stay in place for up to 14 days in sunlight

Duct tape

- Durable and tears easily
- Able to adhere to virtually any indoor or outdoor surface
- Offers excellent versatility

Tamper evident tape

- Strong, durable, resistant to breakage
- Cost-effective security assurance solution
- Deterrent against tampering

Gummed paper tape

- Suitable for e-commerce and fulfilment operations
- Ideal for both hot and cold conditions
- Enhanced strength and security

Standard tape dispenser

- Available in models compatible with 48mm or 75mm wide tape
- Equipped with steel guarded blade

Universal tape dispenser

- Compatible with standard 66m tape and extra long 150m rolls of Envirotape
- Fits any core size
- Easy-loading mechanism and noise saver design

Premium tape dispenser

- To be used with 48mm tape on a 38mm or 75mm core size
- Retractable safety blade
- Easy-loading mechanism and noise saver bar

Desktop tape dispenser

- Can be used with any 25mm tape rolls
- Available in standard or premium styles
- Increases efficiency while being weighted for safety

Discover our range of gummed paper tape machines

Handheld gummed paper tape dispenser

- Compact, ergonomic design reduces hand fatigue
- Uses strong, water-activated, 100% recyclable tape
- Only compatible with standard 50mm x 50m rolls

100% Recyclable tape

Manual gummed paper tape dispenser - Curby

- Manually operated tape dispenser
- Easy push down dispensing
- Ideal for light to medium volume use

Electronic gummed paper tape dispenser

- Range of manual and electronic dispensers available
- Basic to premium models for small to large operations
- Programmable lengths possible for high efficiency

Premium electronic gummed paper tape dispenser

- Moistens, cuts & dispenses tape
- Automatic one-touch dispensing
- Large water tank
- Ideal for high volume use
- Use with Venom reinforced tape

From single packs to bulk purchases, we have highly competitive prices and all our products can be ordered on a next day delivery basis.

String handle gift bags

- 250gsm paper sourced from sustainably managed forests
- Fabric handles for comfort and elegance
- Flat-packed for easy and convenient storage

Recyclable Biodegradable Reusable

Glassine paper bags

- 100% paper alternative to polythene bags
- Translucent, moisture resistant material
- Available in 5 sizes

100% recyclable Biodegradable

Twist handle paper carrier bags

- Strong, block bottom base, gusseted side bags
- Available in medium duty and heavy duty kraft and white sulphite paper

100% recyclable

Block bottom paper bags

- 70gsm brown Kraft paper material
- Gusseted with a block bottom
- Available in a range of sizes

100% recyclable

Tape handle paper carrier bags

- 80gsm sustainably sourced Kraft paper
- Available in brown or white
- A range of sizes suitable for various purposes

Recyclable

Strung paper counter bags

- Multi-use, single ply paper bags
- Ideal for groceries, confectionery, hardware, and more

Recyclable Cost-effective

Open top polythene bags

- Light, medium, heavy and extra-heavy duty available with differing microns and sizes
- Protects items requiring optimal hygiene including food and clothing
- Able to be heat sealed for best sanitation results

20
Micron

Light duty

50
Micron

Medium duty

90
Micron

Heavy duty

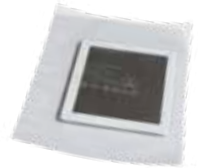

125
Micron

Extra heavy duty

Grip seal bags

- Keeps contents in pristine condition
- Available in medium and heavy duty
- Convenient grip seal fastening
- Write-on-panel option available

Zip lock bags

- Lightweight, reusable polythene bags
- Zip lock closure for greater security
- Available frosted or clear

Anti-static bags

- Protects non-sensitive components from static build-up
- Grip seal or open top style
- Economic and reusable

Metallised shielding

- Faraday cage protection from static charges
- Protects sensitive items, particularly electronics
- Grip seal strip for easy closure and reusability or open top

Document wallets

- Available in 100% paper, or plastic
- Water resistant
- Presents and protects important documentation from external factors

Packaging products manufactured from polythene come in a selection of different sizes and we are a leading supplier of the most popular ranges users of polythene might require.

FIBC & bulk bags

- Highly versatile and flexible containers
- Bags are reusable and easy to store
- Ideal for storing and transporting powders, granules and aggregates

♻️ Recyclable ♻️ 30% recycled content

Bags available in 6 styles

1. Bulk bag
2. Bag with tunnel loops for forklift
3. Bag with fill spout
4. Bag with top skirt and discharge spout
5. Jumbo with top skirt and discharge spout
6. Baffle bag with fill spout and discharge spout

Easy handling and lifting with **tunnel loops**

Efficiently regulate flow of materials with **top skirt** and **discharge spout**

Coveniently fill bag with **no spillage** using **fill spout**

Rubble sacks

- Also known as 'builders sacks'
- Produced from strong LLDPE
- Popular in building, landscaping and construction industries

Refuse sacks

- Suitable for industrial and domestic use
- Available in a range of colours and sizes
- Light, medium, heavy and extra-heavy duty options

We stock a selection of high quality devices used to seal polythene and plastic pouches, producing customisable and secure packaging.

Heat sealers

Handheld heat sealers

- Portable and lightweight
- For occasional use

Standard heat sealers

- Available with or without cutter
- For low volumes

Basic heat sealers

- Cost-effective
- For low volumes

Industrial heat sealers

- Intergrated cutter
- Adjustable sealing time to suit different materials
- For high volumes

Heavy duty heat sealers

- Intergrated cutter
- Available with a foot pedal for semi-automation
- For high volumes

Polyolefin shrink film

- 15 micron thick (60 gauge)
- High clarity point-of-sale packaging

Layflat tubing

- Sold as one continuous tube for customisable lengths
- High tear resistance
- Secured with a heat sealer, ties, staples or tape

Shrink hood machines

- Multi-purpose shrink and seal machines
- All versions feature a roller mechanism compatible with multiple different films
- Four systems available suitable to differing product sizes

Vacuum sealers

- Removes air from inside a bag before sealing
- Use in conjunction with vacuum pouches
- Bags are placed outside the machine

Vacuum chamber

- Choice of desktop and free-standing models
- Removes air from inside a pouch
- Preserves and protects items from air and moisture
- **Shelf life extensions** by removing oxygen (the main causes of metal corrosion and food spoiling)
- **Saving space** by compressing soft goods and products to reduce pack size

Vacuum pouches

- 65 micron thick with a variety of sizes
- Strong, co-extruded material
- Food grade and suitable for use in the medical industry

Vacuum machine & embossed bags

- Compact, low-cost vacuum machine and heat sealer
- Works well with embossed bags for extra internal friction
- Integrated guillotine and various settings

Bagging machines

- Automated pack room equipment
- Bags and seals products at high, programmable speeds
- Incorporates the latest technology to produce rapid, scalable results

Heat shrinking helps secure pallets for transit and is suited to very large items. By using our range of pallet shrink covers, shrink film and tubing in conjunction with our heat shrink guns and accessories, you can be sure to protect items from dust, dirt and extreme weather conditions while stabilising your products.

Polythene (PE) shrink film

- 120 micron thick with wide lengths from 2000m – 4000m
- Centre folded sheet on a roll
- Ideal for wrapping bulky goods and irregular pallets

Pallet shrink covers

- Gusseted pallet covers
- 100 micron high strength blend
- Activated with our Pallet Heat Shrink Gun

30% recycled content

Ripack 2100 gun

- Cool nozzle technology to reduce burning risk
- Large flame for increased efficiency
- Supplied with hose, regulator and tools in heavy duty case

Kite Packaging heat shrink gun

- Our best value heat shrink gun
- Ergonomically designed to fit comfortably into the user's hand
- Supplied with hose and regulator

Ripack 3000 gun

- 360 degree rotating nozzle
- Cool nozzle technology
- 15% more powerful than Ripack 2100

Ripack extension wands

- Compatible with Ripack 2100 & 3000
- Excellent for heat shrinking pallets or products that sit out of reach
- Five lengths available from 570mm–2030mm

Gas cylinder trolley

- Capacity to hold 11-47kg gas cylinder bottles
- Attached hook to carry heat shrink gun
- Heavy duty rubber wheels for stability

Roll dispenser

- Heavy duty mobile dispenser
- Suitable for any product that is perforated on a roll
- Available in 1500mm and 2000mm widths

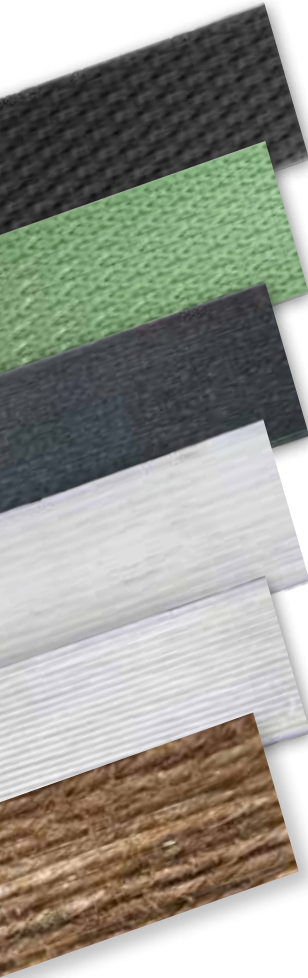

Bundle offers available on website

Bundle 1

Bundle 2

Polypropylene strapping

- Best suited to light and medium duty applications
- Embossed along the length to prevent splitting
- Efficiently bundles, unitises and palletises goods

80%
Recycled

Polyester strapping

- Often used in brick, lumber and textile industries
- Very strong, heavy duty strapping
- Excellent tension properties

Recyclable

97%
Recycled

Steel strapping

- Our strongest ribbon wound strapping
- Oscillated with high tensile strength for heavy loads
- Commonly used in building and construction

Recyclable

Corded strapping

- Lighter, more flexible alternative to steel
- Stronger than standard polypropylene and polyester
- Used for securing heavy loads

Bale strapping

- Strong, safe alternative to bailing wire
- Extremely secure and lightweight
- Coil designed to fit most popular makes of compactors/balers

Paper strapping

- Designed for use on semi-automatic machines
- Suitable for stabilizing small parcels
- Quick and easy to handle
- 80kg break strength

 
Biodegradable Recyclable

Which one is right for you?

Type of strapping	Breaking strain kg	Elongation	Seals	Can be used with a friction weld tool?
Polypropylene	110 - 300	High	Plastic & steel buckles	Yes
Steel	600 - 900	Low	Steel snap-on	No
Polyester	270 - 440	Low	Serrated metal	Yes
Corded	370 - 440	Medium	Steel buckle	No
Bale	280 - 380	Medium	N/A	No
Film	33	Low	N/A	No
Paper	13	Low	N/A	No

Steel strapping tools

- 13-19mm strapping tensioner for use with a maximum thickness of 0.89mm
- 13mm, 16mm and 19mm strapping sealers for use with snap-on seals
- Combination tools of 13-19mm performing sealing and tensioning with a safety cutter

Polypropylene strapping tools

- 13-19mm strapping tensioners
- For use with maximum strapping thickness of 0.9mm
- Friction weld tools available to apply tension
- Combination tool available

Polyester strapping tools

- 12mm and 16mm strapping sealers
- Friction weld tools for use with strapping widths of 9-16mm
- Cordless model available

9-16mm economy GT cordless friction weld tool

- Ideal for polypropylene and polyester strapping
- Combines quality with affordability

13mm cordless hurricane friction weld tool

- Perfect for polypropylene and polyester strapping
- Simple and easy to use
- Ideal for medium to heavy loads

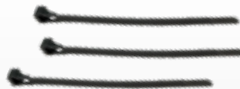

10-16mm Viper cordless friction weld tool

- Ideal for polypropylene and polyester strapping
- Effortless usability with touch display
- Enhanced control over tension speed

Security seals

- Manufactured from strong polypropylene
- Unique sequential numbering for identification

Cable ties

- Made from strong nylon plastic
- Easy application
- No metal barbs or cumbersome wedges

Seals & buckles

- Galvanised metal and plastic strapping seals used to secure strapping
- Enforces appropriate strap tension

Strapping kits

Kite offers cost-effective and ready-to-go strapping kits. We supply both standard and heavy-duty strapping kit options, including a range of tools for tensioning and sealing as well as dispenser and trolley units to provide added efficiency for the operator.

Corded polyester

Polypropylene

Steel

Polyester

Semi-automatic strapping machine

- Automatic tension and sealing
- Improved operational efficiency
- User-friendly operation
- Requires very little maintenance

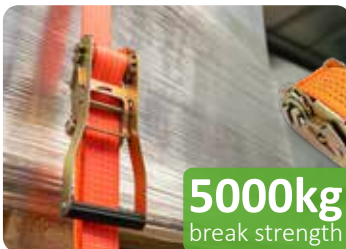

Polypropylene strapping

Semi-automatic banding machine

- Adaptable to various package sizes
- User-friendly operation
- Durable and reliable
- Versatile tape application

Paper or film strapping

5000kg
break strength

Ratchet straps

- Polyester webbing provides strength, durability & weather-resistance
- Long-lasting, reusable, and economical
- Lightweight, flexible, and easy to store
- J hook attaches effortlessly to anchor points

Single face corrugated rolls

- Corrugated fluting on one side with a smooth reverse
- Offers protective cushioning against impact

100% recycled content Recyclable

Ribbed kraft paper

- 70gsm and 90gsm paper, 100% virgin material
- Light to medium duty for wrapping fragile items

100% recyclable Biodegradable

News offcuts (filler paper)

- 45gsm unprinted white newspaper offcuts
- Used to wrap individual items or fill voids inside a box

100% recycled content Recyclable

Corrugated sheets

- Available as single or double wall corrugation
- Strong dividing layers for cartons or stacking

Recyclable

Cardboard fanfold

- Bespoke packaging on demand
- C flute corrugation provides crush resistance & stacking strength
- Ideal for businesses dealing with products of various sizes

Fully recyclable

Paper rolls:

Waxed kraft paper

- Heavy duty paper with a wax finish on both sides

VCI (Volatile Corrosion Inhibitor) paper

- Designed to protect metal from rust and tarnish

Pure kraft paper rolls

- Sustainably sourced wrapping material

Recycled paper rolls

- 100% recycled plain brown packing paper

Kraft union paper

- Two laminated kraft layers with bitumen centre

Timber cases

- Sustainably sourced 6mm plywood
- Built for extremely heavy or highly fragile products
- Supplied flat packed with hinged walls
- ISMP15 compliant

Attached lid containers

- Recycled plastic content in every size and design
- Stackable and nestable
- Versatile and robust

100% recycled Reusable

Plastic pallet boxes

- Reusable end-to-end transit system
- Stackable and nestable for optimal space conservation
- Use with forklifts, pump trucks and pallet box lifters

Recyclable Reusable

Do not stack cones

- Simple and cost-effective
- Prevents over stacking on pallets, enhancing safety
- Secure with either strapping or tape
- Supplied flat packed

Steel pallet stillages

- Highly robust steel stillages
- Available fully enclosed, open fronted, with a half drop side or detachable sides
- Post pallets and chute pallets also available

From durable wooden pallets to lightweight nestable and rackable plastic pallets, and eco-friendly presswood pallets, we have the perfect solution for your logistics requirements.

Presswood pallet

- ISPM15 compliant
- Lightweight, cost-effective, and easy to handle
- Nestable design conserves space during storage and transit

100% wood Reusable

Wooden pallet

- Crafted from strong timber for reusability
- Heat treated for ISPM15 compliance
- Features four-way forklift or pallet truck entry

Recyclable Reusable

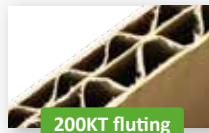

Nestable plastic pallet

- Durable, lightweight, and cost-effective
- Impressive dynamic capacity for goods protection
- No compromise on functionality or affordability

100% recycled Reusable

Cardboard pallet boxes

- Pallet boxes designed for heavy items in transit
- Easily collapsible for easy storage
- ISPM15 compliant
- Available in different strengths

Stretch wrap audit

Our team of dedicated pallet wrap specialists work in close partnership with customers, sourcing innovative solutions which are designed through scientific analysis for retaining and stabilising loads whilst delivering cost savings.

Pallet wrap solutions

Kite's team know only too well the implications that the transport chain can have on a load. With around 40% of UK loads insufficiently wrapped it's vital that business are aware of what their products do, not only when they are wrapped but also after they are wrapped. This is where Kite can help.

Hand pallet wraps

Applied either by hand or using a dispenser for increased efficiency, our range of hand films are available with varying cores, thicknesses and colours.

An **extended core** allows the user to hold the 65mm of exposed cardboard ends to wrap film quicker and easier. A **flush core** does not have this excess at each end, instead the film fits flush to the end of the core. Coreless films omit the cardboard core entirely for an eco-friendly option that is loaded onto a reusable dispenser.

Micron differences cater toward different applications: heavier or more abnormal pallets that may protrude, for example, will require a thicker film while lighter, regular pallets can use wrap comprised of fewer microns.

Eco-friendly options available

Up to **30%** recycled content

Mini stretch wrap

Measuring 100mm (width) x 150m (length), great for bundling small loads and available in white, black or printed in 15 and 17mu.

Cast

Greater transparency, enabling barcodes/labels to be easily read. Extremely good tear resistance with a very consistent cling.

Blown

Very high puncture resistance and ideal in dusty and cold temperatures (-32C) due to it being very tacky. It offers excellent load stability.

Hand pallet wrap selection tool

Ventilated stretch wrap

- Pre-stretched for high-quality adherence to pallets/products
- Allows moisture to escape
- Prevents condensation build up
- Blown film grants puncture resilience & strength

Available as hand or machine pallet wrap

Suitable for:

Pharmaceutical products

Fruits & vegetables

Fish & meat

Plants & horticulture

100% BRC
Recyclable Certified

Pallet top covers

To protect palletised goods from dust or dirt when used in conjunction with stretch wrap.

Hand pallet wrap dispensers

Hand pallet wrap dispensers for quick and easy wrapping. Options suitable for core size 38-78mm or cordless. Designed to be comfortable and robust.

Custom logo printed stretch wrap

For companies transporting products via road, air or sea, custom printed pallet wrap secures goods and is a highly effective, low-cost method of improving your brand visibility.

Stretch safe system

- Suitable for pallets <2m in height with just 600mm surrounding space
- Incorporated roping device for maximum load stability
- Adjustable tension ensures pallets are wrapped

Wraps up to 50 pallets per hour

40%
faster than hand wrapping

5x5 SYSTEM

Hand pallet wrap dispenser

Ergonomically designed to improve comfort and efficiency

- Provides machine technology in the hand
- Pre-stretch gears release film at optimum elastic point
- Pallets are less likely to collapse during transit

60% reduced plastic usage

72% reduced CO₂ emissions

50% less stress on the body

Recyclable films

5X5 nano pallet wrap

Clear	500mm x 500m
Clear (heavy duty)	500mm x 300m
Black	500mm x 300m

Machine pallet wraps

Kite also supply a selection of films suitable for use with our manual and automated machines, granting high volume, consistent, continuous wrapping with savings of up to 50%. This stems from the increased elongation that can be activated when film is applied by a machine rather than by hand, reducing material usage.

The Bio film product enhances our eco-friendly options further. Available as either a hand or machine film, it is made from sugar cane and hence its raw material is carbon neutral. With a 17 micron thickness and 250% elongation, it exhibits the same strength as its oil-derived counterpart.

Coloured stretch films have specialised uses and can similarly be supplied as either machine or hand film:

- White film grants UV protection and is commonly used for security.
- Blue film identifies the contents as food.
- Black film is used to indicate high security.

We offer a range of systems, including a manual machine, turntable pallet wrappers and robot stretch wrapping machines to cater to businesses of all sizes.

Turntable

Turntable pallet wrap machines

- Entry level to advanced options with low profiles available
- Enables maximum wrapping efficiency
- Provides consistency for uniform pallets
- Range of accessories to tailor toward needs

Low profile

- 60% reduced ramp thickness compared to standard
- Available in Masterplat and Rotoplat
- Allows easier movement of products onto the machine

Space saving

Easy loading due to thinner ramp

Load from every angle

New disk rolling system

Rotating arm

Fully automatic turntable machines

- Variable pre-stretch up to 400%
- Can wrap 100+ pallets per day

Robot machines

- Flexible mobile machines for efficient wrapping
- Supports all types of loads, even abnormal shapes
- Three specifications available
- Operated via a digital control panel

Robotic

Fully automatic turntable machines

- Variable pre-stretch up to 400%
- Can wrap 100+ pallets per day

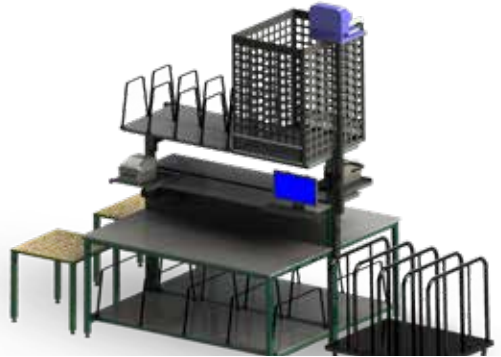

To facilitate efficient production within a packroom, Kite can supply packing stations, alongside a range of practical tools and devices to streamline tasks.

Custom packing benches

- Ready built units made to order
- Personalised to suit your packing requirement
- Ideal for ecommerce, manufacturing or general warehouse
- 40mm box steel, welded together to ensure maximum strength and durability

Choose your colour

Compact packing benches

- Produced from powder coated steel and MFC melamine faced chipboard worktop
- Shelving version available with two roll holders
- Arrives flat packed for easy construction

Available in sizes

- 1) 1200 x 800 x 830mm
- 2) 1800 x 800 x 830mm

Premium packing benches

- Withstand weight of 250kg when evenly distributed
- 3 designs with different accessory configurations
- Can be used individually or integrated together

Sloping top workstations
