## Our auditing process

**Please note:** To qualify for a free pallet wrap audit, your business must be wrapping over 100 pallets a day.

### Case study

A northern paint manufacturer faced pallet collapses during transit due to heavy dynamic weight movement, leading to health and safety issues, product loss, and cleanup costs.

We protected the goods with less plastic and a lower CO2 footprint, following EUMOS standards with longitudinal and lateral tests, and optimising the film and machine combination.

Claim your **FREE** audit

**33%** plastic usage reduction

**£200k** worth of damages saved per year
