

Right Solution Every Time

Stretch Wrap

Save Money

Stretch wrap is a significant expense. Businesses often do not look at the stretch wrap used and the process of wrapping when operational issues occur. Kite's specialist stretch wrap division has worked with businesses saving them a significant amount of money and solved problems, by developing tailored pallet wrapping solutions.

Health and Safety

Hand wrapping pallets is a very common warehouse operation and unfortunately, so are the health and safety issues that come with it. Wrapping loads by hand requires the operator to use poor body mechanics and circle the load a number of times whilst walking backwards, causing an array of hazards and long term injuries. Kite's recently launched patented 5x5 system solves all of these problems.

Stretch Wrap Audit

Kite's stretch wrap specialists are experts, focusing on the health and safety issues within a company and the process of using stretch wrap. The wrapping of a pallet and the type of pallet wrap being used is often an after-thought for companies, however can be the cause of many operational issues. It is important for new and existing customers to carry out a scientific stretch wrap audit, focusing on the stretch wrap technique, the wrap being used and the holding forces involved.

Kite supplies the widest range of quality stretch films in the UK market with specifications to suit all applications. We regulate production tolerances to **guarantee** roll length, thickness and weight.

Hand Film

15 different hand films.

Available in clear, blue, black and printed, from 6mu – 30mu.

Machine Film

Full range to suit all applications up to 400% stretch.

Available in clear, blue, black, white & printed, from 8mu – 34mu

Mini Wrap / Spiral Wrap

Mini stretch film rolls for hand & spiral wrap for machine applications.

Available in printed, clear and black.

Specialist Film & Machines

Ventilated Stretch Film

- Allows products to breathe – Flowers, plants, fruit and vegetables
- Allows heat to escape – Pasteurised drinks, beers, canned food, pharmaceutical products
- Ideal when products need to freeze quickly – Dairy products, frozen foods
- Eliminates the build-up of condensation
- Prevents the development of bacteria

Printed Stretch Film

Branding -

printed pallet wrap offers a great opportunity to build and advertise your brand

Security -

printed pallet wrap is the ultimate tamper evident way to protect your pallet loads

Kite's Machine Range

Offering solutions for both low & high volume operations. Why not ask one of our engineers what your company could **save**

Semi-Auto

Fully Auto

Robot

Book an Audit & Save Money

Kite's specialist team of highly experienced stretch film engineers can visit you to carry out a scientific audit of your stretch film requirements. **Call today to book your audit 02476 420065**

Load Stability Testing Kit

Audits conducted using latest generation Highlight test system

ASTM Audit Process

1. Evaluate machine capability by testing the current achieved stretch
2. Wrap with the current film and test the holding force
3. Cut and weigh the current film to work out the cost per pallet
4. Recommend alternative films for the correct load containment
5. Optimise machine performance to increase the holding force
6. Re-test and provide data showing savings

80% of UK pallet wrap machines operate at less than 80% efficiency

Kite can show you how to improve the productivity of your machine

Kite will demonstrate how to save money and reduce environmental waste

Data analysis is provided to prove your load is safe

Our engineers will conduct regular re-visits to ensure maintenance of best practice, quality & safety

Health & Safety

5x5 System tested by EAWS against:
ISO 11228 (Ergonomics – Manual handling - Pushing & Pulling)
ISO 11226 (Ergonomics – Evaluation of working postures)

- ### 5x5 System

 - Apply hand stretch film around pallets just like a machine.
 - Ergonomically designed to improve comfort and efficiency of wrapping.
 - Operator walks forwards improving wrapping speed.
 - No bending or stretching required when wrapping, therefore reducing fatigue.
 - Fixed gear ensures pallets are uniformly wrapped and less film is wasted.
- ### Stretch Safe System

 - Manual mobile wrapping system, designed to wrap any pallet under 2 metres in height.
 - Only requires 600mm of space around the pallet.
 - 40% time saving compared to the traditional method of hand wrapping.
 - Roping device to ensure maximum load stability.
 - Adjustable tension ensures pallets are uniformly wrapped and less film is wasted.

Our Branches

Our Major Accounts business focuses on large users requiring mostly bespoke packaging. Our branch Packaging Technologists and Account Managers will advise on improving your complete packaging process. We offer a range of supply chain solutions including stock-and-serve, JIT, direct line feed and much more.
